October 13, 2010 | 7:30am-5:00pm

BIMForum Tours

October 13, 2010 | 1:00pm-5:00pm

Registration Now Open for the Fall 2010 BIMForum October 14-15, 2010 in Atlanta

The Fall 2010 BIMForum will be held in Atlanta, GA on October 14 and 15. The theme of this meeting is the "Evidence on BIM: High performance Hype Meets Reality." The BIMForum recognizes that Owners and others in the building industry are struggling to determine if using BIM improves performance on a capital project. Therefore, this meeting will focus on whether real-world evidence substantiates the claims the BIM leads to higher performance in design, construction, operation and maintenance.

Presentation topics will include:

- Does BIM actually lead to higher performing Buildings?
- Can the Evidence Based Design process be applied to BIM?
- How do Owner's evaluate BIM practitioners and make decision about using BIM?
- What post-occupancy evidence exists that demonstrates that BIM buildings perform as projected?

The BIMForum has grown into THE industry-leading user's group focused on the application of virtual design and construction for the AEC industry. It includes more than 1,800 members from the most advanced firms across the commercial construction Industry.

Registration Also Open For:
