Safety Training **On Your Terms: ONSITE**

Carolinas AGC specializes in customized, on-site safety training for contractors. These programs tailor safety training to a contractor's specific needs, even down to a particular job site.

OSHA Construction Outreach

10-hour or 30-hour OSHA courses are available at your location (or ours)!

OSHA-Style Audits

We visit job sites anywhere in the Carolinas to conduct mock OSHA inspections to identify problem areas for GC's and subcontractors. Includes written documentation, photos, full analysis reports and review of conclusions. Available in half-day or full day sessions.

Safety Training Classes

Safety training classes are specifically tailored toward individual contractor concerns whether specific to site or general in nature. Available in half-day and full-day increments, training modules are conducted at a location of the firm's choice.

Half-day Training Classes

- OSHA Record Keeping
- Fall Protection Safety
- Hazard Communication Safety
- Personal Protective Equipment/JSA
- Ladder and Stair Safety
- Hand and Power Tool Safety

Full-day Training Classes:

- Competent Person Trenching and Excavation Safety
- Respirator Safety
- Forklift Safety
- Crane Safety/Rigging

Cost:

CAGC members receive the most cost effective training prices in the region. Flat fee courses start at **\$650 per 1/2 day** and **\$950 for full day** services. **OSHA 10-hour courses are \$1350**, all for up to 30 students! Non AGC members must pay an additional 50% for all training services.

Call **Kenny Boggs, CAGC Director of Safety Services** at 704/372-1450, ext. 5249 to schedule training. For more information check out www.CAGC.org, then click on Safety & Health/Training.
