

Christopher Baidenmann, Senior Construction Associate with MC Consultants, Inc., has over 10 years of building envelope consulting experience ranging from new development quality assurance and warranty claim management, to building systems failure analysis, remediation design and third party oversight.

Mr. Baidenmann holds a Bachelor of Science degree in Industrial Engineering and applies a high level of optimization and efficiencies to complex processes and analysis involved in construction projects and forensic evaluation. His involvement with hundreds of different projects on both the West and East coasts of the United States has enabled him to coordinate and work in multiple disciplinary teams through the assessment of commercial, residential, and institutional projects.

He is known for applying building inspection technology such as thermography, hygrothermal studies, architectural isolation testing, and the use of drone technology to efficiently and effectively obtain the information required to accurately assess and interpret project data that is critical to developing solutions for the integration of building systems, people, equipment, energy, knowledge, time and money.
