ELECTRONIC DELIVERY MANAGEMENT SYSTEM

General

This Special Provision contains requirements for incorporating a Global Positioning System (GPS) Fleet Management System for materials that are compensated by ticket. The system shall be used to monitor, track, and report loads of materials during the construction processes from the point of measurement and load-out to the point of incorporation into the project. The use of this technology is referred to as e-Ticketing.

Equipment

At least 30 days prior to use, the Contractor shall submit, to the Engineer, a Global Positioning System (GPS) Fleet Management System supplier that can provide a qualified representative for on-site technical assistance during the initial setup, pre-construction verifications, and data management and processing as needed during the project to maintain equipment.

Contractor shall provide operator settings, user manuals, and required viewing/export software for review, and ensure the equipment will meet the following:

- The Fleet Management system shall include a device that is capable of GPS tracking of vehicles and is installed on all dump trucks, pavers, materials transfer vehicles, or any other vehicle used, to incorporate materials into the project. Department personnel shall have the ability to access Real-Time monitoring using a state-furnished mobile device such as an iPad, smartphone, etc.
- The Fleet Management system shall be fully integrated with the Contractor's Load Read-Out scale system at the HMA plant site or quarry.
- The Fleet Management system shall have the ability to measure and track vehicles and their contents continuously from the plant site or quarry to the project site. The system shall have offline capabilities due to loss of power or GPS connectivity. To be considered continuous, no two data points shall be more than 60 seconds apart unless the vehicle is stopped. Stop times shall be recorded.

HMA plant sites or quarries shall have a reliable, stable internet connection.

Construction

(a) Construction Requirements.

Contractor shall install and operate equipment in accordance with the manufacturer's specifications. Contractor shall also verify that the GPS is working within the requirements of this Developmental Specification.
